

ANSWERS TO QUESTION - 1

1. Objective

This document outlines the test plan for the SauceDemo - online shopping application. The objective is to ensure that all features and functionalities of the application work as expected for the target audience.

The testing will focus on validating the complete shopping journey, including user login, product browsing, product selection, shopping cart management, checkout, order completion, and logout.

2. Scope

The scope of this test plan includes:

Features to be Tested

- Login and authentication
- User account access
- Product listing
- Product search/browsing
- Product sorting
- Product details
- Add to Cart
- Remove from Cart
- Shopping Cart
- Checkout
- Customer information
- Order summary
- Order completion
- Navigation menu
- Logout
- Application state/reset functionality

Types of Testing

- Manual testing
- Functional testing
- UI testing
- Smoke testing
- Sanity testing
- Regression testing
- Retesting
- Usability testing
- Compatibility testing
- Negative testing

Environments

Testing will be performed across:

- Different browsers
- Different operating systems
- Desktop and mobile/tablet devices
- Different network conditions

Evaluation Criteria

- Number of defects identified
- Defect severity and priority
- Test case pass/fail percentage
- Test execution completion percentage
- Defect resolution time
- Regression test results
- User experience and usability

Team Roles and Responsibilities

- **Test Lead:** Prepare test strategy, monitor testing activities, review test results.
- **QA/Testers:** Create and execute test cases and report defects.
- **Developers:** Analyze and fix reported defects.
- **Project Manager:** Monitor project progress and coordinate stakeholders.
- **Business/Stakeholders:** Review requirements and approve testing deliverables.

3. Inclusions

Introduction

This test plan defines the testing approach, scope, objectives, environments, resources, risks, and deliverables required to validate the SauceDemo online shopping application. The primary goal is to ensure that users can successfully log in, browse products, add products to their shopping cart, complete checkout, and receive an order confirmation.

Test Objectives

The main testing objectives are:

- Verify that users can log in using valid credentials.
- Verify appropriate validation for invalid login attempts.
- Verify that products are displayed correctly.
- Verify product names, descriptions, prices, and images.
- Verify product sorting functionality.
- Verify Add to Cart and Remove functionality.
- Verify shopping cart calculations and contents.
- Verify checkout form validations.
- Verify order summary and total calculation.
- Verify successful order completion.
- Verify navigation and logout functionality.
- Identify functional, UI, usability, and compatibility defects.
- Ensure that fixes do not introduce regression defects.
- Validate the complete end-to-end shopping process.

4. Exclusions

The following areas are outside the scope of this test plan:

- Real-world payment gateway processing.
- Actual credit/debit card transactions.
- Real product delivery.
- Real inventory management.
- Actual shipping and logistics.
- Real customer support operations.
- Third-party payment provider testing.
- Production infrastructure monitoring.
- Testing of external systems not controlled by SauceDemo.
- Penetration testing unless specifically requested.

- Performance testing of the underlying production infrastructure beyond basic application-level checks.

5. Test Environments

Operating Systems

- Windows 10/11
- macOS
- Linux
- Android
- iOS

Browsers

- Google Chrome
- Mozilla Firefox
- Microsoft Edge
- Safari

Devices

- Desktop computers
- Laptops
- Tablets
- Smartphones

Network Connectivity

- Wired network
- Wi-Fi
- 4G/5G cellular network
- Slow/unstable network conditions for basic usability testing

Hardware/Software Requirements

- Minimum 4 GB RAM for desktop testing
- Modern web browser
- Stable internet connection
- Screen resolution testing across common desktop and mobile resolutions

Security Protocols

- Username/password authentication
- HTTPS connection
- Session management
- Authentication/session validation
- Password masking

Access Permissions

- **QA/Testers:** Execute test cases and report defects.
- **Developers:** Investigate and resolve defects.
- **Test Lead:** Manage testing activities and test results.
- **Stakeholders:** Review and approve deliverables.

6. Defect Reporting Procedure

Steps for Reporting Defects

1. Identify the defect.
2. Reproduce the defect.
3. Record the test case ID.
4. Provide detailed reproduction steps.
5. Record expected and actual results.
6. Assign severity and priority.
7. Attach screenshots or videos when applicable.
8. Attach relevant logs or browser console information.
9. Submit the defect in the tracking system.
10. Retest the defect after the developer provides a fix.

Defect Severity

Severity	Description
Critical	Application cannot be used or major functionality is completely unavailable.
High	Major functionality is broken and there is no reasonable workaround.
Medium	Important functionality has a defect but a workaround may exist.
Low	Minor UI, text, alignment, or cosmetic issue.

Defect Priority

Priority	Description
P1	Fix immediately; blocks critical business functionality.
P2	High-priority defect requiring prompt resolution.
P3	Normal-priority defect.
P4	Low-priority/cosmetic defect.

Tracking Tools

- JIRA
- Excel/Google Sheets for basic defect tracking

7. Test Schedule

Task	Duration	Timeline
Requirement/Website Analysis	1 Day	Day 1
Test Plan Preparation	1 Day	Day 2
Test Scenario Creation	1 Day	Day 3
Test Case Creation	2 Days	Day 4–5
Test Environment Setup	1 Day	Day 5
Smoke Testing	1 Day	Day 6
Functional Test Execution	3 Days	Day 7–9
Compatibility/UI Testing	1 Day	Day 10
Regression Testing	2 Days	Day 11–12
Retesting	1 Day	Day 13
Test Summary Report	1 Day	Day 14

Estimated Testing Duration: 14 Working Days

8. Test Deliverables

The following deliverables will be prepared during the testing lifecycle:

- Test Plan
- Test Scenarios
- Test Cases
- Test Data
- Test Execution Report
- Defect Reports
- Regression Test Report
- Retest Report
- Compatibility Test Report
- Test Summary Report

9. Tools

Tool	Purpose
JIRA	Defect tracking and management
Excel	Test case and test execution management
Microsoft Word	Test Plan and test documentation
Mind Mapping Tool	Test scenario brainstorming
Snipping Tool	Screenshots for defect evidence
Browser Developer Tools	UI/network/console investigation
Selenium	Optional automated regression testing
Postman	API testing, if applicable

10. Risks and Mitigations

Risk	Impact	Mitigation
Non-availability of testing resources	Testing delay	Backup resource planning
Website/Build URL unavailable	Testing cannot proceed	Notify stakeholders and work on test documentation
Less time for testing	Reduced coverage	Prioritize critical business flows
Browser compatibility issues	Some users may experience defects	Test on multiple supported browsers
Environment issues	Test execution delay	Prepare backup environment
Defects discovered late	Release delay	Perform early Smoke and Functional Testing
Requirements unclear	Incorrect test coverage	Clarify requirements before execution
Frequent application changes	Regression issues	Maintain and execute regression suite
Network instability	Inconsistent results	Test under multiple network conditions
Critical defect blocks testing	Reduced test coverage	Escalate immediately and prioritize defect resolution

11. Approvals

The following documents should be reviewed and approved by the relevant stakeholders:

- **Test Plan**
- **Test Scenarios**
- **Test Cases**
- **Test Data**
- **Defect Reports**
- **Test Execution Reports**
- **Regression Test Reports**
- **Test Summary Report**

Approval

Role	Name	Signature	Date
Test Lead			
QA Tester	SYED AL SADI	<i>sadi</i>	02 sep 2026
Developer			
Project Manager			
Client/Stakeholder			

Final Test Objective

The primary goal of this test plan is to ensure that SauceDemo's core e-commerce functionality works reliably from the user's perspective, particularly the complete flow:

Login → Product Selection → Add to Cart → Cart Verification → Checkout → Customer Information → Order Review → Order Completion → Logout

Created by: SYED AL SADI

ANSWERS TO QUESTION - 2

30 validation points for the following features.

- Login Checklist
- Registration Checklist
- Checkout Checklist

Sheet link: [📄 Test Checklist](#)
